

std::false\_type

```
classDiagram
    class std_false_type["std::false_type"]
    class detail_has_non_default["detail::has_non_default< BasicJsonType, T, typename >"]
    detail_has_non_default --|> std_false_type
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `std::false_type`. It has three horizontal compartments: the top one contains the class name, and the two below are empty. A blue arrow with an open triangular head points upwards from a darker gray box below to the bottom edge of the `std::false_type` box. The darker gray box represents the derived class `detail::has_non_default< BasicJsonType, T, typename >`. It also has three horizontal compartments: the top one contains the class name, and the two below are empty.

detail::has\_non\_default  
\_from\_json< BasicJsonType,  
T, typename >
