

std::false_type

```
classDiagram
    class std_false_type["std::false_type"]
    class detail_is_constructible["detail::is_constructible< BasicJsonType, ConstructibleObjectType, typename >"]
    detail_is_constructible --|> std_false_type
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `std::false_type`, which has two empty slots below its name. A dark gray box at the bottom represents the derived class `detail::is_constructible< BasicJsonType, ConstructibleObjectType, typename >`, which has three slots below its name. A blue arrow points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

detail::is_constructible
_object_type_impl< BasicJsonType,
ConstructibleObjectType, typename >
