

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class detail_is_json_iterator_of["detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::iterator >"]
    detail_is_json_iterator_of --|> std_true_type
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class `std::true_type`, which is divided into three horizontal sections. Below it is a darker gray box representing the derived class `detail::is_json_iterator_of< BasicJsonType, typename BasicJsonType::iterator >`, also divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the derived class box to the bottom section of the base class box, indicating that the derived class inherits from the base class.

detail::is_json_iterator
_of< BasicJsonType, typename
BasicJsonType::iterator >
