

basic\_json::sax\_parse

basic\_json::sax\_parse

detail::binary\_reader  
::sax\_parse

```
graph LR; A[basic_json::sax_parse] --> C[detail::binary_reader::sax_parse]; B[basic_json::sax_parse] --> C;
```

The diagram illustrates a function call resolution or dispatch mechanism. On the left, there are two identical white rectangular boxes, each containing the text 'basic\_json::sax\_parse'. On the right, there is a single gray rectangular box containing the text 'detail::binary\_reader::sax\_parse'. Two blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that both public methods delegate the call to the same internal implementation.
