

```
bool_constant< impl  
::is_c_string< T >()>
```

The diagram illustrates a C++ template specialization. A light gray box at the top represents the primary template `bool_constant< impl::is_c_string< T >()>`. Below it is a darker gray box representing the specialization `detail::is_c_string< T >`. A blue arrow with a triangular head points from the specialization box up to the primary template box, indicating that the specialization inherits from or is used by the primary template.

```
detail::is_c_string< T >
```
